AGRIKRANTI 1928

Aditya Kumar, M.Sc. (Ag.) Soil Science - Gold Medalist (DDUGU) · Semester Paper Series

B.Sc. (Hons.) Agriculture - First Semester Examination

ENG-101: Comprehension and Communication Skills in English · Credit 2 (1+1)

Model Question Paper - 1 (50 marks pattern)

Time: 2 Hours **Maximum Marks: 50**

Note: The paper has three sections A, B and C. Follow the instructions given in each section.

Section A - Very Short Answer (all compulsory) 5 × 2 = 10

1. **10**

(a) Give one synonym and one antonym of: Abundant, Fertile, Scarce, Rapid.

(b) Use the homophones in sentences: (i) principal / principle (ii) weather / whether.

(c) Fill in the blanks with articles / prepositions: (i) ___ farmer bought ___ acre of land near ___ Ganga. (ii) The seeds were sown ___ June and harvested ___ October.

(d) Correct the sentences: (i) Each of the students have a lab manual. (ii) The quality of these seeds are good.

(e) Change into indirect speech: (i) He said, "I am sowing wheat." (ii) The officer said to me, "Have you irrigated the field?"

Section B - Short Answer (attempt any four of six) 4 × 5 = 20

2. Read the passage and answer the questions: **5**

> Soil is a living resource. A handful of healthy soil contains billions of micro-organisms that break down organic matter and release nutrients for crops. Continuous use of chemical fertilisers without organic manure has reduced the organic carbon of many Indian soils. As a result, crop yields have become stagnant even when farmers apply more fertiliser. To restore soil health, farmers should test their soil regularly, apply balanced fertilisers, add farmyard manure or compost, and grow legumes in rotation. The Soil Health Card scheme helps farmers know the nutrient status of their fields. A healthy soil means a healthy crop, a healthy farmer and a healthy nation.

(i) Why is soil called a living resource? (ii) What has reduced organic carbon of soils? (iii) Give two ways to restore soil health. (iv) Which scheme tells the nutrient status of fields? (v) Give a suitable title and the antonym of "stagnant".

3. Differentiate homonyms and homophones with examples. Use in sentences: affect / effect, advice / advise, loose / lose. **5**

4. Transform as directed: (i) Only farmers attended the meeting. (Negative) (ii) He is too weak to work in the field. (Remove "too") (iii) The crop is very good. (Exclamatory) (iv) The farmer ploughs the field. (Passive) (v) As soon as it rained, farmers began sowing. (No sooner ... than) **5**

5. Combine into one sentence: (i) He worked hard. He passed the examination. (ii) The farmer is poor. He is honest. (iii) This is the field. My father bought it last year. (iv) It rained heavily. The crop was damaged. (v) You must irrigate the crop. Otherwise it will dry. **5**

6. Write a job application for the post of Agriculture Technical Assistant. **5**

7. Make a précis of the following passage and give a suitable title: **5**

> Water is the most important input in agriculture. Nearly half of the cultivated area of India still depends on rainfall, and the uneven distribution of monsoon causes drought in some regions and floods in others. Excessive pumping of groundwater for paddy and sugarcane has lowered the water table in many states. Farmers must therefore use water wisely. Micro-irrigation methods such as drip and sprinkler save a large amount of water and increase yield. Rainwater harvesting, farm ponds and mulching also conserve moisture. If every drop of water is used carefully, Indian agriculture can remain productive even in years of poor rainfall.

Section C - Long Answer (attempt any two of four) — 2 × 10 = 20

8. What is the importance of professional writing? Prepare a Curriculum Vitae (CV) of a fresh B.Sc. Agriculture graduate. **10**

9. (a) Write a paragraph on "Role of Youth in Agriculture" (about 120 words). (b) Write a report on the Kisan Mela organised in your college. **10**

10. What is a synopsis? Write a synopsis (research proposal) on "Effect of vermicompost on growth and yield of wheat". **10**

11. What is an interview? Describe its kinds, importance and process. **10**
